Chennai- 602105

Student Name: Aaron Samuel S

Reg. No: 1924211022

Course Code: CSA4305

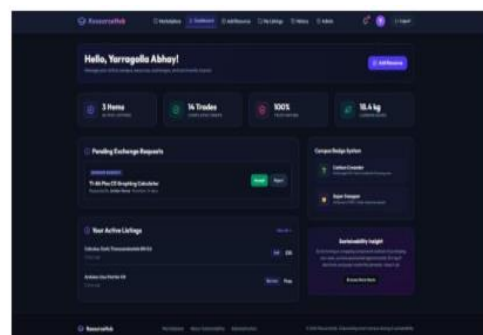

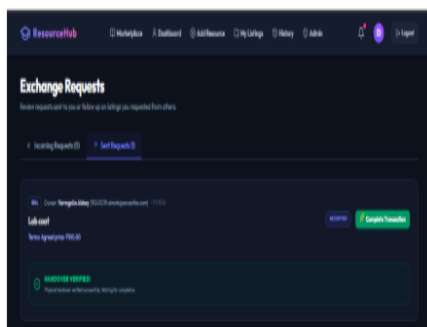

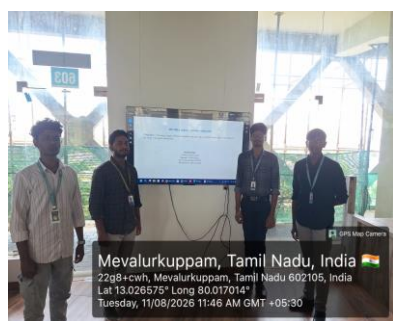

Slot: D

Course Name: INTERNET PROGRAMMING

Course Faculty: Dr.D.Sudhagar

Project Title: AutoSense: ESP32-Based Intelligent Ultrasonic Automation System

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: (here you write what you did in this project (contribution) including Model Description)

Project Description

Module 2: Resource Listing & Marketplace

Module Description:

This module provides a platform where students can **list, discover, and exchange academic resources** such as textbooks, notes, study materials, and other educational items. It supports **buying, selling, lending, donating, and exchanging** resources, making it easier for students to access affordable and useful study materials

Working Principle:

1. The user **uploads a resource** with details such as title, category, price, condition, and seller information.
2. The resource is **stored and displayed** in the marketplace for other users.
3. Users can **search and filter** resources based on their requirements.
4. They can choose to **buy, sell, lend, donate, or exchange** the resource.
5. The owner can **edit, update, or remove** their listing whenever required.
